

TESS102 DATASHEET

INTERNAL TRAPEZOIDAL TENSION SYSTEM

Bespoke shapes to meet your requirements.
Any angle, any direction, anywhere.

Modern glazing design is anything but square. For special shapes including domes and tapered windows, the TESS 102 provides an adaptable solution. Relieving rollers allow the blind to follow the direction of curves whilst ultra-thin cables maintain fabric tension. Unlimited colour finishes and a wide range of fabrics make it suitable for any project. Our single barrel mechanism keeps the fabric constantly under tension and produces a smooth, quiet travel.

- Single barrel tension system
- Any angle, any direction
- Trapezoidal or uneven shapes
- Domes, angles and curves
- Reliable and robust
